SEVEN SECRETS FOR RAISING A DREAMER:-

DARE to let children dream of changing the world

RAISE children with dreams that will bring meaning into their lives

EXPLORE all the life-areas children are good at or excite them—clear indicators of the made-to-fit dreams that God has put in their hearts

AFFIRM belief in children’s dreams by exposing them to all the available information and experiences that will help them to define their dreams.

MAKE USE of every opportunity to help children learn from role models – positive and negative ones

“So you want to know the secret of successful parenting? The answer is the same for parents, teachers, anyone in a leadership position: Be what you want those who look up to you to be.”

Thomas Carlyle

“There is no greater influence on the life of a child than a living example of moral strength. For children to learn to take morality seriously, they need to see adults living moral lives.”

William J Bennett

“Mum gave me something I want to hold onto forever. She taught me that life can be difficult and often unfair, but that it still is good to be alive.”

From the film Life is Beautiful 1998

Olivet Artwork Castlemaine Show

Two people had gone on a nature walk. On their return, people wanted to know: “What did you see? Tell us!” One replied, “Oh, you know, same old mountains and trees, the sun, streams, green grass, blue skies..” And the other one, “Oh! The mountains and trees! The sun! Streams! Green grass and blue skies!”

To be a good role model, we should:

Be honest about our weaknesses and limitations.

Openly acknowledge that we are dependent upon God.

Be prepared to admit that you need other people.

If we can bring children to understand that though we are all ordinary people with limitations, the Dream Giver (God) uses each of us in a unique way, we will have given them an inheritance that no one can take away.

ENCOURAGE children to rely on the Dream Giver as the only Guide who will show them how to shape their dreams to fit in with God’s Big Dream for the world.

REMEMD children that following a Big Dream requires perseverance, tenacity and creative problem solving.

PLEASE PRAY THIS WEEK for the COX CRITCHLEY and CULPH Families.

BEING CAUTIOUS

Classes have been looking at this character trait over the past two Chapel sessions:

“Knowing how important right timing is in accomplishing right actions”

*For who maketh thee to differ from another?* I Corinthians 4:7

Learning styles are those inborn strengths and characteristics possessed by every individual. Understanding our prominent learning styles is not a formula or solution to all our problems. It does, however, provide a framework, enabling us to focus on individual strengths and build confidence. Learning styles in themselves are neutral; therefore, students of various learning styles have equal opportunity to do well. There is no single BEST style, nor does any style make a person smarter or more capable than another. All learning styles still require accountability and high standards of conduct (not an excuse for inappropriate behavior); however, supervisors should be flexible and not rigidly compartmentalize students.

Each person’s individual learning style is as unique as his signature. Learning style strengths are pieces of a puzzle, not neat categories to be identified and fit into. There are some of all styles in every one of us, and we must remember that acceptance and unconditional love are imperative to any child’s successful development.
