ENGLISH

Course Description

The Year 6 English course has been designed around the three strands of Language, Literature and Literacy. Together, the strands focus on developing students' knowledge, understanding and skills in listening, reading, viewing, speaking, writing and creating. Students experience a range of written and multimodal texts, in order to enjoy, inform and develop their understanding. Students express their own thoughts and feelings through a range of written exercises. Oral communication is developed through questioning, answering and sharing experiences.

Aims

- To understand that God is a communicating God; He wants us to know His thoughts
- To develop good public speaking and oral communication skills and techniques
- To write effectively to communicate thoughts, feelings and record information
- To develop skills to acquire knowledge by reading
- To appreciate, critically study and evaluate fiction texts
- To interpret and evaluate the spoken and written word
- To use correct grammar, spelling and punctuation

Topics

- Speaking and Listening
- Reading silent, oral, group, comprehension, vocabulary
- Writing recount, exposition, report, narrative, procedure, explanation and poetry
- Spelling
- Grammar sentence structure, punctuation, vocabulary
- Literature studies

Time Allocation

• Approximately 390-400 minutes per week

- Oral Presentations
- Oral Reading and Reading Comprehension
- Writing samples
- Tests
- Spelling Tests
- Standardised Testing
- Book Reports
- Teacher observations

MATHS

Course Description

The Year 6 Mathematics course focuses on providing students with essential mathematical skills and knowledge in the area of Number and Algebra, Measurement and Geometry, and Statistics and Probability. The mathematics course emphasises the importance of using concrete materials and making Mathematics relevant to everyday situations, in order to understand its relationship to daily life. Throughout the course, students are provided with the language and strategies needed to build their understanding of mathematical concepts and solve problems using all four operations.

Aims

- To understand that number concepts begin with God
- To give students the opportunity to experience the process through which Mathematics develops
- To learn techniques and tools which reflect modern mathematics
- To learn to communicate mathematically
- To develop the capacity to use mathematics in solving problems individually and collaboratively
- To develop confidence and competence in using Mathematics in commonly occurring situations

Topics

Number and Algebra:

- Number & Place Value
- Integers
- Operations
- Decimals
- Fractions
- Fractions & Percentages
- Patterns & Algebra

Statistics and Probability:

- Data
- Chance

Measurement and Geometry

- Shape
- Geometry
- Units of Measurement
- Operation with Measurement
- Locations & Transformation
- Money & Financial Matters

Time Allocation

Approximately 375 minutes per week

Assessment

- Observation of participation and progress
- Unit testing
- Teacher scored activities

On Demand testing

SCIENCE

Course Description

The Year 6 Science Course is designed to develop students' understanding of local, national and global issues and the interconnectedness of the past, present and future with Science. Students are encouraged to pose questions, gather evidence, conduct experiments, analyse data, draw conclusions and effectively communicate their ideas. The Year 6 Science course emphasises a Biblical perspective, encouraging students to develop sound values and attitudes such as curiosity and respect for God's creation and people.

Aims

- To encourage the students to become active participants as they investigate
- To allow students to gain essential scientific understanding of concepts from these experiences
- To engage students in learning through hands-on inquiry learning
- To have students directly observe science in action
- To promote enthusiasm and curiosity about science with the students
- To enhance a student's knowledge about God's amazing and wonderful world around them

Topics

- Life and Living Biological Sciences
- Energy and Change Physical Sciences
- Earth and Beyond Earth and Space Sciences
- Natural and Processed Materials Chemical Sciences

Time Allocation

• Approximately 90-125 minutes per week

- Unit Indicators
- Class participation
- Creativity
- Research skills
- Projects
- Presentation oral and material
- Unit Tests

HASS

Course Description

The Year 6 HASS course includes the subject areas of History, Geography, Economics and Civics and Citizenship.

The Year 6 History course focuses on the social, economic and political development of Australia as a nation, particularly after 1900.

The Year 6 Geography course explores the continents of Asia, looking at the Culture and Geographical features

The Year 6 Civics and Citizenship course provides opportunities for students to develop understanding about government and democracy, laws and citizens and citizenship, diversity and identity.

The Year 6 Economics course develops the students' understanding of opportunity cost and why decisions about the ways resources are allocated to meet needs and wants in their community. They investigate the limited nature of resources and how businesses and consumers make choices with this in mind.

Aims

- To understand that God has used history to mould and develop our great nation
- To investigate the events that lead to Federation
- To investigate the people that played an important role in the Federation of Australia
- To investigate the impact of British colonization on the rights of early Aboriginal Australians
- To develop an appreciation of the vastness and magnitude of God's world around us both far and near
- To introduce students to the location of Asia in the world
- To introduce Asia's resources, landforms, bodies of water and culture
- To introduce the concepts of needs and wants
- To develop an understanding of the basic economic problem of scarcity
- To introduce/define the concept of goods and services
- To understand that Federation made a way for a new system of government based on the Westminster system
- To introduce the 3 levels of government
- To explore the making of laws in Australia and to examine what the courts do in Australia
- To ensure that students are aware of the process of becoming an Australian citizen, who is eligible for this and what it means to be a citizen

Topics

- Australia as a Nation
- Federation
- Canberra
- Australian Inventions
- Federation to the Present
- •

- Asia
- The Economic Problem Scarcity
- Needs and Wants
- Goods and Services
- Government Democracy and Federal Laws
- Australian/Global Citizens

Time Allocation

Approximately 180-225 minutes per week

- Unit Indicators
- Class participation
- Creativity

- Research skills
- Projects
- Presentation oral and material
- Unit Tests

MUSIC

Course Description

Students further their knowledge of the elements of music. They extend their understanding and use of aural skills as they sing and play independent parts against contrasting parts and recognise instrumental, vocal and digitally generated sounds. Students explore and use rhythm, pitch, dynamics and expression, form and structure, timbre and texture in the music they perform and compose. They also consider meaning and interpretation, forms and the elements of music as they make and respond to music.

Aims

- Recognise compound metre (6/8)
- Explain how the elements of music are used to communicate meaning in the music they listen to, compose and perform
- Describe how their music making is influenced by music and performances from different cultures, times and places
- Use rhythm, pitch and form symbols and terminology to compose and perform music
- Sing and play music in different styles, demonstrating aural, technical and expressive skills by singing and playing instruments with accurate pitch, rhythm and expression in performances for audiences

Topics

- Notes and Rests (review)
- Time Signatures (review)
- Treble Clef and Bass Clef
- Compound Metre
- Form
- Music Appreciation
- Singing
- Group Instrumental
- Music Composition

Time Allocation

1 period per week

- Performances
- Musical Compositions
- Topic quizzes
- Participation
- Classroom activities

VISUAL ART

Course Description

In Year 6 Visual Arts, students undertake units of work which investigate a range of art media and techniques. This usually includes working with a selection from an array of potential subject matter in the disciplines of visualisation, observation and perspective drawing using pencils, felt-tip markers and pen and ink. Students then progress to painting with both watercolours and acrylics. Within a 2-year cycle, they may at times diversify into basic printmaking. Students explore processes and make decisions to select and apply various techniques to their work as they develop their knowledge, understanding and skills. They develop practical and critical understanding of how artists use artworks to engage audiences and communicate meaning. They also learn to identify stylistic features of other cultures and art movements and they explain how art conventions, concepts, styles, cultures and viewpoints are represented in both their own and others' artworks.

Aims

Students:

- have opportunities to explore a variety of art media and develop their skills
- learn to communicate their ideas through visual representations
- · can identify stylistic features of other cultures and art movements
- consider the viewpoints of others and how these ideas can influence their own work
- develop their own personal style of artwork and the connection to their own uniquely created identity
- discuss the artistic intentions behind their own work and respond to content and ideas in the work of others
- develop problem solving and critical thinking skills as they seek to improve their work practices
- use a range of presentation skills to plan and display their work
- understand that artwork can be seen everywhere in the wonder and beauty of God's creation and this can inspire us to enjoy creating our own artworks
- recognise and develop their own God-given ability to be creative

Topics

- Visualisation Drawing, Observational Drawing and Perspective Drawing
- Watercolour Painting
- Acrylic Painting
- Printmaking

Time Allocation

Approximately 100 minutes per week

Assessment

General observation, formative and summative assessment modes are applied to the areas of:

- Knowledge of practices, visual conventions, viewpoints and the critical evaluation of their own work
- Skills, techniques and processes in using art materials and the representation and refinement of finished artworks
- Students also demonstrate both their knowledge and skills through the communication of ideas
 and meaning in their work, the exploration and documentation processes they use, the
 representations of their unique creative thoughts and development of personal style in their
 work.

LOTE - AUSLAN

Course Description

As students progress through Years 5 & 6, they learn to discuss aspects of their daily lives, and to respond to the signed comments of others. They learn to follow more complex instructions and directions (in Auslan), involving a number of steps. Students are be able to start a simple conversation involving two or more signers, and how to interrupt the conversation of others using the correct cultural protocols. Students also recognise and paraphrase information (announcements etc.) and prepare and present short signed presentations. Students also learn to use body shift, eye gaze, and head orientation to represent different characters in simple imaginative texts. Students understanding of Deaf culture continues to develop, including the relationship between English and Auslan.

Aims

- To share ideas and feelings about the people they know, their daily lives, and social activities
- To collaborate with peers to plan and conduct shared presentations
- To communicate appropriately using Auslan, while involved in shared learning activities (voice-off etc.)
- To collect, classify and paraphrase information from a variety of Auslan texts
- To create and interpret simple imaginative text
- To demonstrate understanding of the nature of identity in relation to themselves and the Deaf community

Topics Include

- Greetings & introductions
- Alphabet & numbers
- Class related signs (people, subjects, sports activities etc.)
- Deaf culture
- Transposition (directions)
- Story telling
- Interpreting & paraphrasing

Time Allocation

• 1 period per week

Assessment

- Participation in visual communication activities
- Completion of topic related crafts
- Participation in classroom activities
- Ability to understand and follow basic visual instructions

Formative assessment and observation

TECHNOLOGY DESIGN

Course Description

In Year 6 Design Technology, students undertake units of work which investigate the characteristics and properties of a range of materials, systems and components, as well as the tools and equipment they use. Students aim to develop individual and creative project plans and consider the appropriate use of resources when making designed solutions. Examples of products which can be fabricated by Years 5 and 6 students include acrylic identification tags, timber and plywood pencil boxes with sliding acrylic lids and wood-burnt decorative designs, individually designed returning boomerangs and uniquely shaped timber and translucent acrylic money boxes.

Students also investigate the client needs that drive demand for their products and learn to work within design briefs as they generate their ideas, produce designed solutions and evaluate the success of their work.

Aims

Students:

- learn to use the design process through research, drawing and planning
- develop critical and creative thinking skills
- identify design constraints and considerations
- articulate their understanding of design solutions through participation in classroom discussions
- understand safe workshop practices
- develop knowledge of and skills with workshop hand tools.
- understand the properties of a range of materials, both natural and synthetic
- complete a product evaluation
- consider that just as all products are designed and produced to fulfil a specific need, we too
 are designed and created for a purpose

realise that their choices and actions can impact others and the environment

Topics

May include:

- Acrylic ID tag
- Plywood and pine pencil box with sliding acrylic lid, twisted metal handle and wood-burnt decoration
- Returning boomerang with decorative design
- Uniquely shaped timber and translucent acrylic money boxes

Time Allocation

Approximately 50 minutes per week

Assessment practice:

• General observation, formative and summative assessment modes are applied to the areas of Knowledge and Skills.

TECHNOLOGY DIGITAL

Course Description

In the Year 6 course, students develop an understanding of the role individual components of digital systems play in the processing and representation of data. They acquire, validate, interpret, track and manage various types of data and are introduced to the concept of data states in digital systems and how data are transferred between systems. They also develop their skills in applying technical protocols such as devising file naming conventions that are meaningful and determining safe storage locations to protect data and information.

Aims

- To introduce students to basic computer components (external), port interfaces, humancomputer interface devices, software & computer peripherals (input and output devices)
- To effectively navigate operating systems i.e. Windows, manipulating elements within each operating system to achieve basic objectives of the study domain and file storage
- To develop an ability to effectively and safely use computers both independently and creatively using a wide range of software.
- To develop awareness of the place of computers in the home, in the community and in the school

Topics

- This is a Computer
- Buy a Computer
- Software
- Files and Folders
- Internet
- Internet Safety
- Files
- Windows
- Internet Research
- Using Search Engines
- The Largest...
- The Fastest...
- The Longest

Time Allocation

• Approximately 30 minutes per week

- Class participation
- Creativity
- Production Quality
- Completion and presentation of research materials
- Unit Tests

HEALTH

Course Description

The Year 6 Health course encourages students to develop knowledge, understanding and skills to create opportunities and take action to enhance their own and others' health, wellbeing and safety.

The course provides opportunities for students to contribute to building a positive school and home environments that support healthy, safe and active choices for everyone. They are also encouraged to explore a range of factors and behaviours that can influence health, safety and wellbeing.

Aims

- To develop an appreciation of the marvellous bodies that God has created as our abode
- To develop a healthy lifestyle
- To contribute to a healthy lifestyle both as individuals and as a group
- To learn to make wise choices with our health and lifestyle

Topics

- Eyes
- Ears
- Teeth
- Taste
- Gut & Digestion
- Food
- Muscles
- Bones
- Circulation, Fitness & Exercise
- Breathing
- Skin
- Hot/Cold Weather & Body Heat
- Medicines

- Parasites & Body Care
- Height & Weight
- Safety with Machines
- Medical Practitioners & Health Helpers
- Diseases
- 'Our body a temple marvellously made'
- Road Safety
- Protect my ears & eyes
- Cleanliness
- I'm Hurt & CPR
- Safety Sense & Sensibility

Time Allocation

• Approximately 30 minutes per week

Assessment

- General observation of completed tasks
- Involvement in discussions

Attitudes displayed during class

PHYSICAL EDUCATION

Course Description

Students investigate different aspects of sports including the use of space, teamwork and strategies in both team sports and individual games. Students examine their unique Godgiven gifts and talents and recognise the role each can play. Students consider and learn about different health and nutrition components and can identify the connections between themselves and the effect health has on the human body. Students will continue to build on and refine their fine and gross motor skills that are sport specific while participating in a range of sports.

Aims

- To understand the importance and benefits of physical fitness and learn ways to improve and maintain fitness
- To build on the basic ball skills and movement skills developed in earlier years
- To improve social confidence and competence in small and large group activities
- To develop teamwork and sportsmanship in a competitive environment
- To develop knowledge of how we can show God's character traits of graciousness, team unity, encouragement, and take care of our bodies

Area of Study

- Swimming and water safety
- Athletics
- Fitness Training
- Movement
- Gymnastics
- Cross Country
- District Schools Sports Days
- Skill that support Major Games
- Sports Football, Tennis, Hockey, Cricket, Basketball, Netball, Soccer, T-ball, Softball, Newcomb
- Health

Time Allocation

• 1 period per week

Mr Ian Nicholas

This is just a few of the off-site activities enjoyed by our students.

Swimming All Primary students are involved in the swimming program for either 5 weeks if in an outdoor pool or the whole term if the heated pool is available.

Chess Challenge Students enjoy a day of interaction and challenge with the other Primary schools in the region. Harry Poulton has been an asset teaching the students the finer points of the game.

Sport activities - with other Regional Schools including – Cross Country Run, Netball, AFL 9s Football, MiloT20 Blast Cricket

- Cross Country Sport Day Regional School challenge. Years 3, 4, 5, and 6 compete in the Castlemaine and District Primary Schools Cross Country Run at the Botanical Gardens in Castlemaine.
- Orienteering Day An interschool Orienteering Day is held, weather permitting, every May. This gives the students an opportunity to interact with the local schools and have a fun day of competition.

Academic Challenges with other Regional schools Maths Problem Solving day and Primary Chess competition

Bi-annual Canberra Trip The Grade 5 and 6 students enjoy a very busy week in Canberra. There is a lot happening all the time so it is great to be there. Students meet with a local politician and even Mr Rudd introduced himself to Mr Nicholas one year! The plane flight to Canberra is always a highlight as there are generally some students who have not been in an aircraft before.

Excursions Students attend an excursion in the last week of every term. These are usually held in surrounding regions and are a highlight to the term.

Weekly efforts are rewarded with

- Academic, Character and encouragement awards
- Medal awards toward house points
- Green dot treats (work fully completed for 3 days in the week)

Other Classes

- Wood / Technology with Mr Knight on Tuesdays
- Language taught in primary is AUSLAN
- Mini Musical End of year presentation
