From the Principals Desk

This week is our last week on our current memory passage from Genesis 1. On Tuesday in assembly, Mr Treloar spoke to us about God's great provision for us in creation. He pointed out that oxygen makes up 21 percent of the air in the atmosphere. This percentage is the exact

balance of oxygen in the air that we need to breathe. If there was 50 percent oxygen in our air, then when someone lit a match we would all go up in a big ball of fire!

This perfect balance, along with many other such perfect balances causes people to ask the question, is it an accident or is it by design? If there is a

design, then it follows that there must be a designer. In creation, God the designer and creator shows us his great power and in his sacrifice on the cross He shows us his great love (John 3:16). Through God's son Jesus we have the opportunity to know the great designer personally and receive the gift of eternal life.
